## PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also out-shipments from the State. Several items of minor importance are excluded and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; fluid milk production data are from farms with herds of 10 or more head; marketings of beef and swine products are from total slaughter figures. Unload data on meats do not include meats in any processed form.

### Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the U. S. Mainland as well as unloads from the outer islands, and therefore, does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighbor islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies. As will be noted from the tables, 1961 total supply of produce and livestock products has been above the 5-year average during the period of 1957-1961. Tourists and Honolulu population have increased consistently during the 5-year period.

## ACKNOWLEDGMENT

The Federal-State Market News work was made possible through the cooperation of the Agricultural Marketing Service, United States Department of Agriculture, and the Hawaii State Department of Agriculture. The Department of Agriculture gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, ferry, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers. The Federal-State Market News data were compiled by Keiji Tsugawa and Ellen Kosaki, statistical clerks.

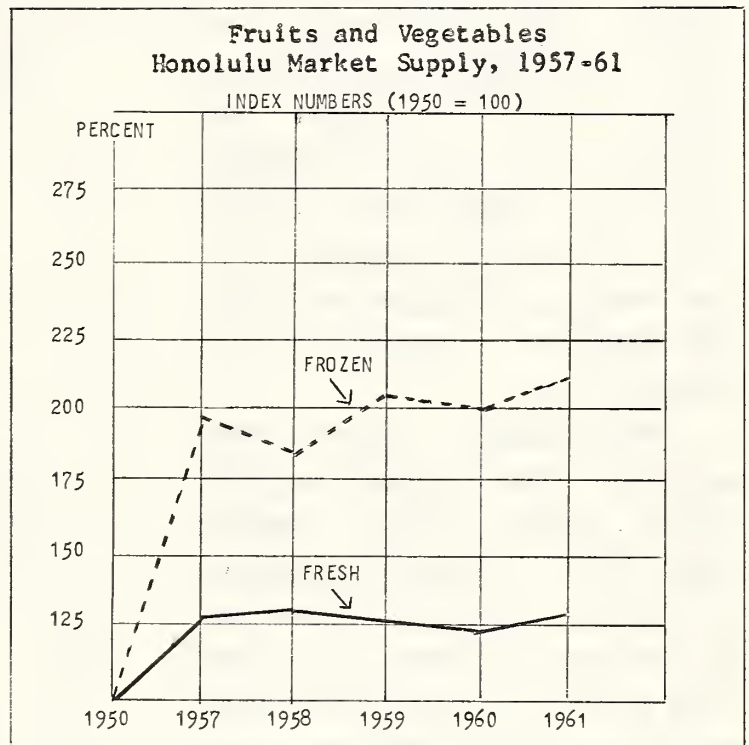

## 5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

### Fresh and Frozen Fruits and Vegetables

Honolulu market receipts of fresh fruits and vegetables for 1961 totaled 116 million pounds equal to the 5-year average of 1957 to 1961. Supplies of state origin in 1961 represented 46 percent of the total marketings of fresh fruits and vegetables. Of the 1961 marketings from state sources, the neighbor islands contributed 53 percent and Oahu's share was 47 percent. Despite two disruptions due to maritime strikes in 1961, the combined imports from the U. S. Mainland and foreign countries increased 1.7 million pounds or nearly 3 percent over 1960. Imports from foreign sources represented the greatest percentage gain with 86 percent whereas imports from the U.S. Mainland increased only 1 percent. However, in poundage, both increases were about the same with U.S. Mainland, 803 thousand pounds and foreign, 877 thousand pounds.

The total imports of frozen fruits and vegetables were 2.5 million pounds in 1961. Compared with the low year of 1958 during the last five years, total receipts of 1961 were 11 percent greater. During the 5-year period of 1957-1961, imports of frozen fruits and vegetables were relatively stable with only minor fluctuations.

### Selected Dairy Products and Oleomargarine

In 1961, total supply of milk marketed in Honolulu was 103.5 million pounds, an increase of 2.9 million pounds over 1960. Fluid milk marketings were practically all from Oahu milk producers.

Imports of all three products, butter, cheese and oleomargarine showed an increase over 1960 but for the past five years, only cheese has increased consistently. The percentage increase of dairy products and oleomargarine in 1961 is as follows: cheese represented the highest gain with 19 percent; oleomargarine showed a gain of 18 percent; and butter followed with a 4 percent rise.

## Poultry Products

Eggs: Both total supply and state marketings continued the upward trend in 1961. Total supply of eggs amounted to slightly over 373 thousand cases (30 dozen), an increase of 5 percent over 1960.

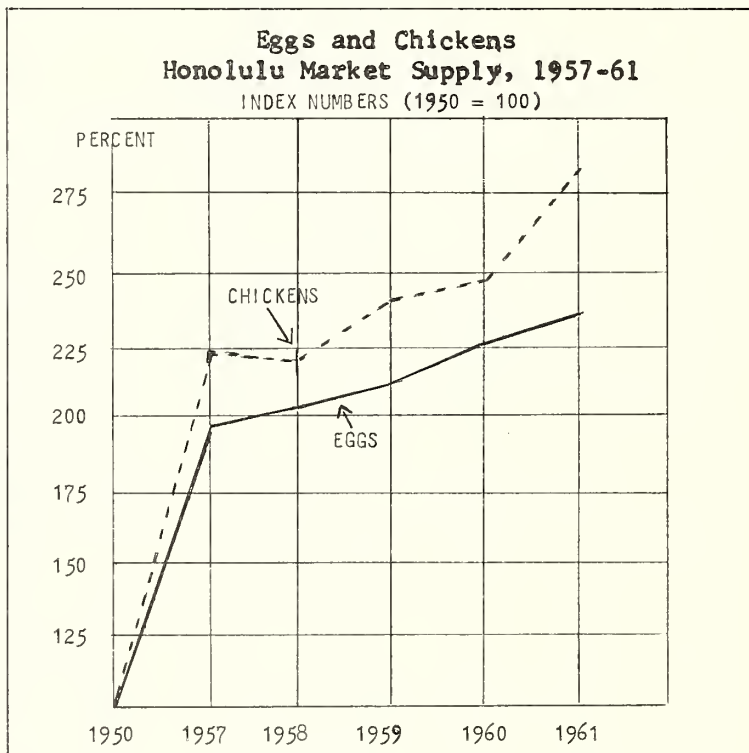

As the state poultrymen increased their flocks, the imports showed a decrease of 14 percent from 1960. However, a sizeable increase of 9 percent was contributed by the state producers to meet the market requirement. It is noteworthy that in 1961, state egg producers marketed 85 percent of the total supply, a record year.

Of the total volume of 373 thousand cases marketed, Oahu's share was 69 percent; neighbor island poultrymen's unloads were 16 percent; and in-shippments from the U. S. Mainland and foreign countries were 15 percent. During the 3-year period of 1959-1961, the neighbor island marketings showed a steady decrease while Oahu production increased 32 percent over 1959.

Poultry Meat: Poultry meat marketed in Honolulu amounted to 10 million pounds in 1961. Imports from the U.S. Mainland consisted of 60 percent of the total volume and the remaining 40 percent were from state producers. In 1961, the total supply increased 1.3 million pounds over 1960; of the increase, in-shippments from the U. S. Mainland were about 1 million pounds and state origin only .3 million pounds. During the 5-year period of 1957 to 1961, only imports continued on a steady growth while state marketings were inconsistent. Nevertheless, in 1961, state marketings showed an appreciable gain of 10 percent over 1960.

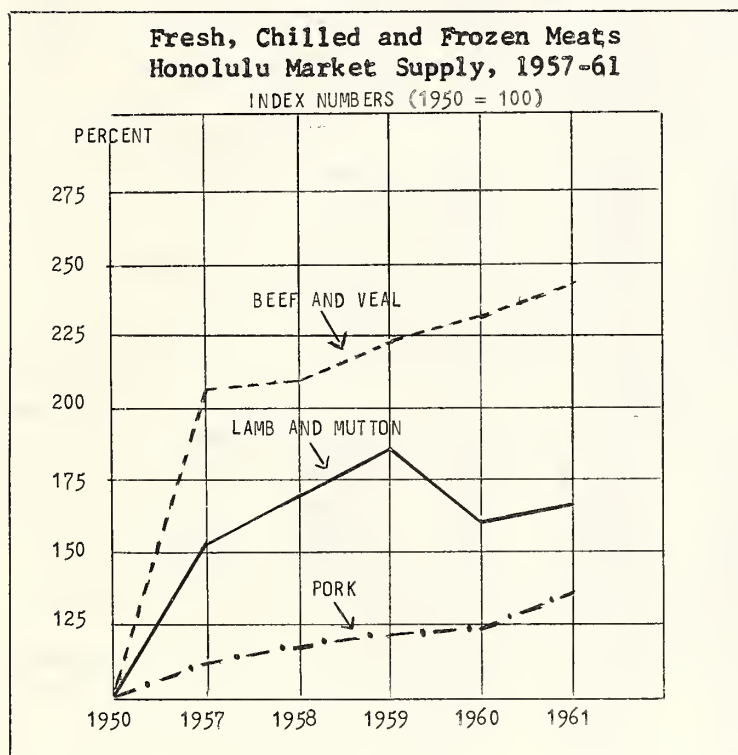

## Red Meats

The total supply of fresh, chilled and frozen red meats has been on a steady upward trend during the preceding 5 years, coinciding with the population increase on Oahu. Market receipts of red meats totaled 54.4 million pounds, an increase of 7 percent over 1960. In-shippments of red meats from the U.S. Mainland and foreign sources which gained 3.9 million pounds, contributed all of the increase to the total supply. State cattlemen on the other hand decreased their marketings about .3 million pounds. Of all the red meats, beef and veal constituted the largest portion with 70 percent,

pork, 28 percent, and lamb and mutton, 2 percent.

**Beef and Veal:** Beef and veal total marketings increased without any fluctuation during the 5-year period of 1957 to 1961. A total of 38 million pounds of beef and veal was marketed in 1961, 2 million pounds more than in 1960. However, only 16.4 million pounds or 43 percent were of state origin. Of the total in-shipments from various sources, beef and veal from Australia and New Zealand increased a phenomenal 209 percent since 1957; whereas shipments from the U.S. Mainland decreased 16 percent. State cattlemen have not kept pace with the increase in the total supply. Although marketings from state producers decreased in 1961, they were still above the 5-year average of 16.3 million pounds.

**Pork:** Although the total supply of fresh, chilled and frozen pork amounted to 15.2 million pounds, an increase of 11 percent over 1960, state hog raisers supplied only 6.9 million pounds, a decrease of nearly 3 percent. Imports from the U. S. Mainland increased 1.7 million pounds contributing to all of the increase in the total supply. This is a substantial gain of 25 percent from the previous year's importation. Usually, pork imports show a definite increase when prices offered at U. S. Mainland markets are low; however, in 1961, despite relatively

stable prices at the U. S. Mainland markets, the imports were increased to meet the market requirements. The reasons for reduction of state marketings may be attributed to unsettled land relocation problems confronting some of the Oahu hog producers and retiring of older generation of hog raisers.

**Lamb and Mutton:** State sheep ranchers supplied only 16 thousand pounds of lamb and mutton or 1 percent out of the total supply of 1.2 million pounds. The state volume in 1961 was the lowest ever recorded during the 5-year period of 1957 to 1961. Total marketings of lamb and mutton were 4 percent greater than 1960 and all of the increase was from in-shipments from the U. S. Mainland and foreign countries.
